

**IMPORTANT SAFETY ADVISORY CONCERNING CERTAIN NOAH'S ARK by  
PLAYGRO™ TOOTHY TEETHERS**

On May 28, 2009, Elfe Juvenile Products Inc., issued a voluntary Safety Advisory concerning certain Noah's Ark by Playgro™ Toothy Teethers.

The liquid inside the teethers may contain viable micro-organisms and, although these micro-organisms are frequently found in the environment and do not generally cause illnesses, the teethers are not in compliance with certain parts of Canada's Hazardous Products Act.

In Canada, this Safety Advisory affects only the Noah's Ark by Playgro™ Toothy Teether Model #111753, with PO #28283 indicated on the tag attached to the product. The corresponding Sears item number found on your receipt of sale is 12024.

In Canada, approximately 7,365 of the Noah's Ark by Playgro™ Toothy Teethers were sold nationwide by major retailers and independent retailers from May 2008 through May 2009.

If you believe you have one of these teethers in your possession, please stop using the unit immediately and contact Elfe Juvenile Products for a \$10 credit certificate by visiting Elfe's website at: [www.elfe.net](http://www.elfe.net) or by calling 1-800-667-8184.
